

## Letter from Luis Coreano, CEO

**MAPP Technologies** has been faithfully serving our clients' needs for 70 years and while I look back at 2020, I am moved by the resilience of my team, our suppliers, and the customers we serve as we worked together to overcome the challenges of a year scarred by global pandemic. The ability to quickly change and adapt was never more important than during the past year.

Despite COVID-19, MAPP continued to grow in 2020 by launching new aerospace and maritime programs which allowed us to increase our workforce and invest in new technologies such as high-speed white light inspection, precision creep-feed grinding, multi-axis milling, EDM drilling and robotic welding.

The momentum will continue into 2021 as we vertically integrate to better serve our customers through the addition new Nadcap accredited special processes to include Nital Etch, Stress Relief, Mag Particle NDT and Shot Peen. MAPP will also become Nadcap accredited for our current paint and coatings processes.

I am delighted to be leading an organization committed to meeting and exceeding the needs of our customers, as well as supporting one another through challenges none of us would have expected over the past 10 months.

I look forward to 2021 with hope that we can all get back to a more normal way of life. I wish all of you a safe, healthy and prosperous New Year.

Sincerely,

A handwritten signature in black ink, appearing to be "Luis Coreano", written in a cursive style.
