

Letter from Luis Coreano, CEO

MAPP Technologies (January 2022) - As I reflect on 2021 and the continued challenges resulting from a global pandemic, I take great pride in the resourcefulness of the MAPP team to overcome immense challenges to meet our client's needs and expectations through innovation and sheer determination.

Despite COVID-19, MAPP has seen two consecutive years of growth through new aerospace and maritime programs which allowed us to increase our workforce and invest in new technologies. The Company's growth is driven by long-term military programs that include the F-35 Lightning, T-7A Red Hawk, F100 Engine (F-15 & F-16), Columbia and Virginia Class Submarines, and Phalanx Closed-in Weapon System programs.

Policy Deployment through MXP (MAPP Excellence Program) will allow MAPP to sustain the momentum into 2022 as we vertically integrate to better serve our clients through the addition of new Nadcap accredited special processes to include Nital Etch, Stress Relief, Mag Particle NDT, and Shot Peen. MAPP will also become a FAR Part 145 Repair Station in Q2 2022, which will allow us to be an MRO recourse to our clients.

I am delighted to be leading an organization committed to achieving absolute client satisfaction, as well as supporting one another through unstable pandemic conditions.

I wish you a safe, healthy, and prosperous New Year ahead.

Sincerely,

A handwritten signature in black ink, appearing to be "Luis Coreano", written in a cursive style.
